Travel Itinerary Agent

# Your smart itinerary: quick and compliant

**Problem**

- Too much flight data to sift through
- No time to research hotels, dining, entertainment at your destination
- Frequently changing policies and requirements
- Non-compliant purchases waste time and require extra approvals

**Solution**

- Integrated itineraries: coordinate flights, hotels, meals with team & policy compliance
- Works with Personal Preference Agent to ensure approved, personalized suggestions
- Maximizes per-diem: suggests restaurants and accommodations within budget
- Proximity-based hotel & dining options—filtered by cost and location

IBM **Conquer Travel**     An agentic system that plans, books, and expenses business travel—tailored to each employee.

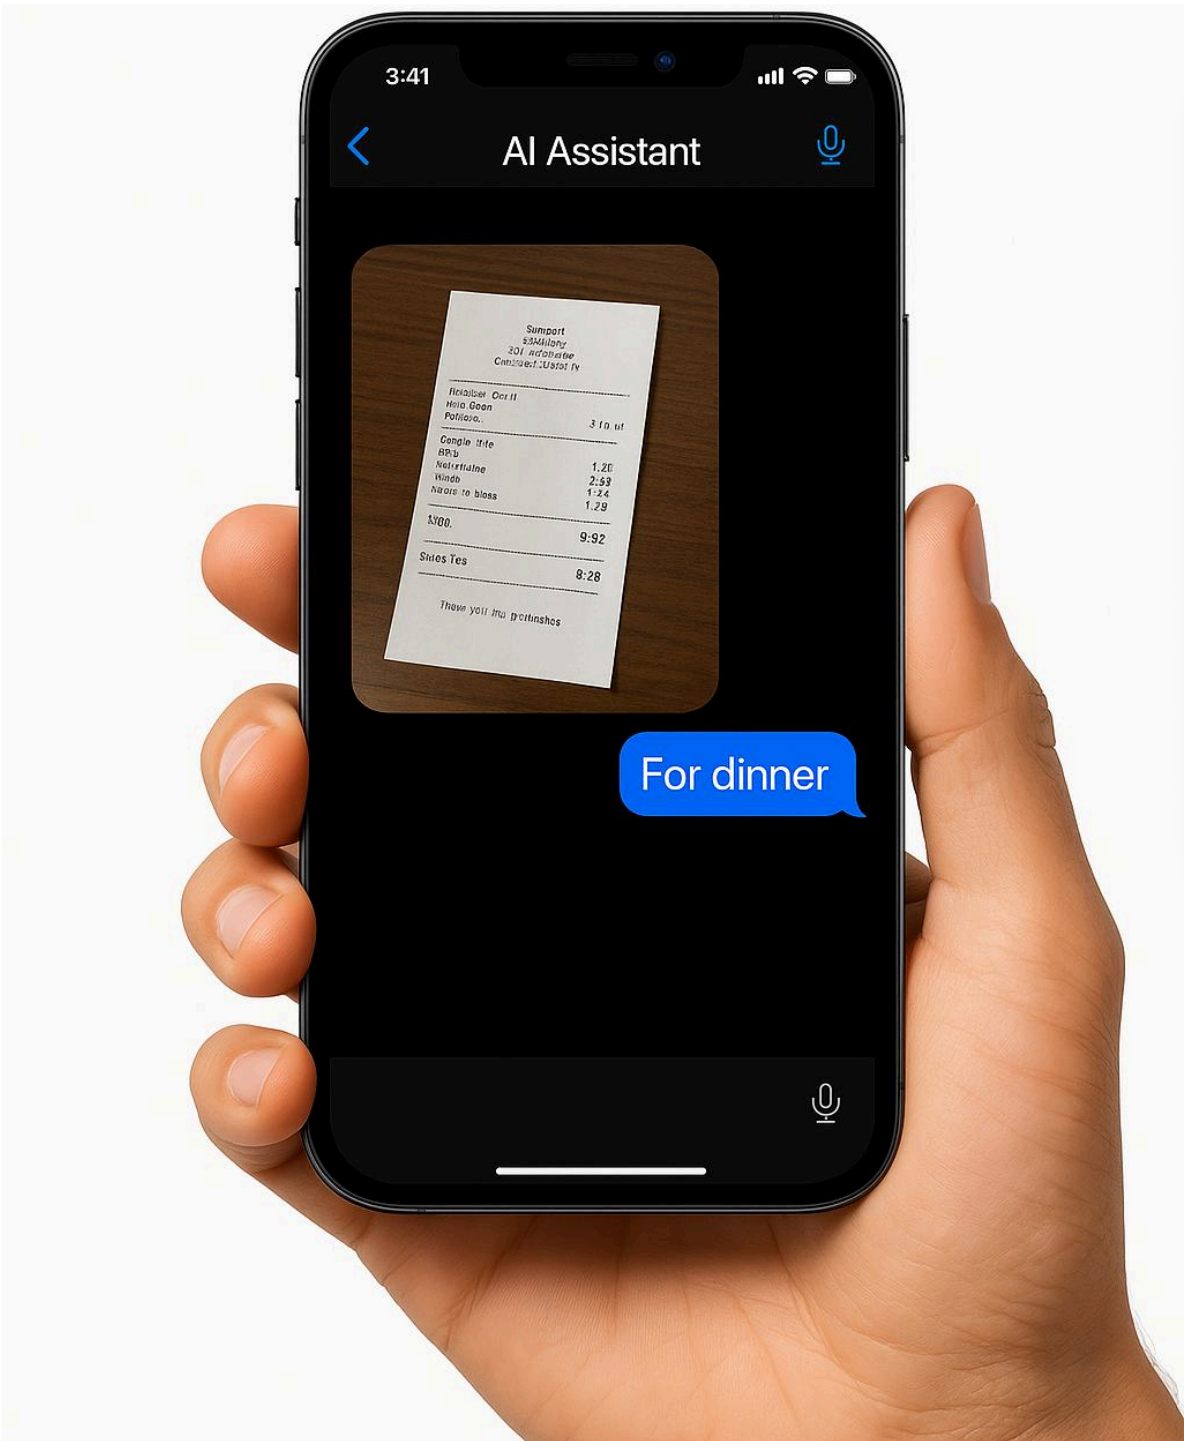

# Receipt to reimbursement—simplified

## Problem

- Missing receipts delay approvals and cause friction
- Pre-approval steps are often overlooked
- Submitting expense reports is complex and time-consuming
- Reviewing policies and guidelines is tedious
- Currency conversion adds extra complexity

| Expense Line Item |                                      |
|-------------------|--------------------------------------|
| Date              | Aug 5, 2025                          |
| Category          | Meals – Dinner                       |
| Description       | Dinner at Trattoria Lucca (2 guests) |
| Total             | \$46.69                              |
| Payment Method    | IBM Corporate Card                   |
| Receipt           | Auto-tagged                          |
| Status            | In Draft Report                      |

## Solution

- Prompt travelers in real time to upload receipts and add memos
- Automatically convert expenses into correct submission currencies
- Scan emails to locate related receipts and fill in details
- Integrate with third-party platforms (Uber, Enterprise, Delta) for seamless data capture
- Complaint reports successfully approved on the first try
